Add QuickSubmit electronic submission link to evidentiary period status #44177

[Open](#)[IainAmosMelchizedek](#) wants to merge 1 commit into `department-of-veterans-affairs:main` from`IainAmosMelchizedek:IainAmosMelchizedek-patch-1` [Conversation 0](#)[Commits 1](#)[Checks 0](#)[Files changed 1](#)[IainAmosMelchizedek](#) commented [4 minutes ago](#)

Are you removing, renaming or moving a folder in this PR?

☒ No, I'm not changing any folders

TeamSites

Did you change site-wide styles, platform utilities or other infrastructure?

☒ No

Summary

- Added a `vaLink` component (QuickSubmit tool) to the `evidentiaryPeriod` case in `getStatusContents()` in `appeals-v2-helpers.jsx`. The link points to the VA's existing QuickSubmit electronic submission tool at `https://eauth.va.gov/accessva/?cspSelectFor=quicksubmit`.
- Bug:** Veterans whose appeal status is `evidentiaryPeriod` are shown only a P.O. box and fax number. The VA's own electronic submission tool, QuickSubmit, is not surfaced anywhere on this page despite being the correct and available submission channel. This bug is documented in Issue [🔗 Bug: evidentiaryPeriod appeal status page does not surface QuickSubmit electronic submission path #44176](#).
- Solution:** Adding a single paragraph with a `vaLink` (QuickSubmit tool) below the address block. This follows existing `vaLink` patterns used throughout this file and requires no new dependencies, no new components, and no state changes. The veteran-facing link text reads: "QuickSubmit tool."
- This is an external contribution from a veteran with an active Board of Veterans' Appeals case. No team owns this contribution. The change is self-contained within one case statement.
- No flipper/feature toggle is used. This is a static content addition.

Related issue(s)

- Bug report filed in this repository: [🔗 Bug: evidentiaryPeriod appeal status page does not surface QuickSubmit electronic submission path #44176](#)
- Proof of concept and documentation: <https://github.com/IainAmosMelchizedek/appeal-evidence-bridge>

Testing done

- **Old behavior:** The `evidentiaryPeriod` status rendered only a P.O. box address block and fax number with no electronic submission option presented to the veteran.
- **New behavior:** A paragraph appears below the address block with a `vaLink` (QuickSubmit tool) and a brief instruction to submit before the deadline. The veteran sees the clickable text "QuickSubmit tool" which navigates directly to the QuickSubmit sign-in page.
- **Steps to verify:** Navigate to the appeal status page for an appeal in `evidentiaryPeriod` status. Confirm the QuickSubmit paragraph renders below the address block. Confirm the `vaLink` (QuickSubmit tool) resolves to `https://eauth.va.gov/accessva/?cspSelectFor=quicksubmit`. Confirm no other status types are affected.
- **Known gap:** This contribution was made without access to a local development environment or test user credentials. Unit tests for the `evidentiaryPeriod` case in `getStatusContents()` should be updated to assert the presence of the new paragraph and `vaLink` (QuickSubmit tool). This is the primary known gap that may raise risk of merging to production without internal review.

Screenshots

	Before	After
Desktop	Appeal status shows P.O. box and fax only	Appeal status shows P.O. box, fax, and QuickSubmit tool link
Mobile	Appeal status shows P.O. box and fax only	Appeal status shows P.O. box, fax, and QuickSubmit tool link

Visual proof of the rendered output is available at:
<https://github.com/IainAmosMelchizedek/appeal-evidence-bridge>

What areas of the site does it impact?

Only the appeal status page when the appeal is in `evidentiaryPeriod` status. No other status types, components, routes, or applications are affected.

Acceptance criteria

Quality Assurance & Testing

- Unit tests for `evidentiaryPeriod` case in `getStatusContents()` should be updated to assert the new `vaLink` (QuickSubmit tool) paragraph renders — flagged as known gap for internal team to address
- ✓ No sensitive information is captured in logging, hardcoded, or specs
- ✓ No linting warnings introduced — change uses existing `vaLink` (QuickSubmit tool) import already present in the file
- ✓ Screenshot of the developed feature is documented in the linked proof-of-concept repository

Error Handling

- ✓ No new error handling required — the QuickSubmit tool link uses the existing `vaLink` component with no async operations or error states
- ✓ No new logging events required
- ✓ No Datadog or Grafana monitor required — static content addition only

Authentication

- Local build verification with test user not completed — flagged as known gap for internal team review

Requested Feedback

This is an external contribution from a veteran identifying a documented navigation defect filed as Issue [#44176](#). The change is intentionally minimal — one paragraph, one `vaLink` (QuickSubmit tool), zero deletions. The veteran-facing link text reads "QuickSubmit tool" and navigates directly to `https://eauth.va.gov/accessva/?cspSelectFor=quicksubmit`. The primary request is that the internal team verify the render output against the `evidentiaryPeriod` status in a local environment and update the relevant unit test to cover the new `vaLink` (QuickSubmit tool) paragraph. Full proof of concept, screenshots, and formal documentation are available at <https://github.com/IainAmosMelchizedek/appeal-evidence-bridge>.

Compliance note

The contributing guidelines for this repository state that issues should be labeled `bug` prior to submission. This label was not applied to Issue [#44176](#) because the Labels field in the issue creation interface is not accessible to external contributors — the field is visible but non-interactive. This is documented here in the event the PR is flagged for non-compliance with labeling requirements: the omission is a result of access restrictions imposed by the repository configuration, not a failure to follow the contributing guidelines. The intent to label Issue [#44176](#) as `bug` is stated explicitly here as the functional equivalent.

  Add QuickSubmit electronic submission link to evidentiary period status ... aa2f541

Additional context for reviewers

Incorrect mailing address on VA.gov

The P.O. box currently displayed on the `evidentiaryPeriod` status page — Board of Veterans' Appeals, PO Box 27063, Washington, DC 20038 — does not route correctly. Evidence mailed to this address was tracked and confirmed to have been routed to Wisconsin, not Washington, D.C. This resulted in extended transit time and required the veteran to pay higher postage than would have been necessary had the correct address been provided from the outset.

This is not a minor discrepancy. Veterans are submitting time-sensitive evidence under active deadlines. An incorrect mailing address on the official VA.gov status page is a documented harm — not an inconvenience.

Fax as a submission option in 2026

The status page currently lists fax number 844-678-8979 as a submission method. Fax infrastructure has been broadly discontinued across the private sector. In 2026, directing veterans — many of whom are not in institutional or government settings — to submit time-sensitive legal evidence via fax is not a reasonable accommodation. It is an institutional failure to update guidance in accordance with the technology environment veterans actually operate in.

QuickSubmit already exists

The VA's own QuickSubmit tool is operational, available, and designed exactly for this use case. It requires no new development, no new infrastructure, and no new budget. The only missing piece is the link — which this PR adds in eight lines of code.

This comment is submitted as part of the public record of this contribution.
